

TECHNICAL DATA SHEET

The company requires n. 2 black armed wings, to be positioned on the stage for the scenography, with a minimum height of 220cm and a width of approximately 80cm.

2 ballasts of at least 10 kg each are required to anchor the wings, or the possibility of fixing them to the stage with screws.

It is required to be able to anchor, approximately halfway down the stage, at a minimum height of 3m, the wire that supports the two curtains (nylon painter's sheets) necessary for the scenography.
